I have prepared a retire letter for this mine, however we do not have a closure task - I received an email from the BLM that indicates they are going to close their file and recommend full bond release (BLM holds the bond on this one)

The site was reclaimed several years ago, and aside from the BLM wanting the access road blocked the site has met reclamation requirements. Ed Ginouves sent me an email with photos that documents that the road has been blocked and they (BLM) are preparing to close the file (they need our concurrence to release the bond - thus the letter I drafted)

The operator has lost his claims for this mine (they have been picked up by another party) so it is very unlikely he can mine here again.
